### DETAILED ACTION

1. This action is in response to Applicant's Amendments on November 02, 2006 have been considered, but are deemed moot in view of new ground of rejections below.
2. Claims 1-21, 23-26 and 29 are amended. Claim 22 is canceled. Claim 37 is added. The pending claims are 1-21 and 23-37.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-21 and 23-37 are rejected under 35 U.S.C. § 101 because the claimed invention is directed to non-statutory subject matter.

As set forth in MPEP 2106 (II) (A):

*A. Identify and Understand Any Practical Application Asserted for the Invention*

*The claimed invention as a whole must accomplish a practical application. That is, it must produce a "useful, concrete and tangible result." State Street, 149 F.3d at 1373, 47 USPQ2d at 1601-02. The purpose of this requirement is to limit patent protection to inventions that possess a certain level of "real world" value, as opposed to subject matter that represents nothing more than an idea or concept, or is simply a starting*

Art Unit: 2166

point for future investigation or research (*Brenner v. Manson*, 383 U.S. 519, 528-36, 148 USPQ 689, 693-96); *In re Ziegler*, 992, F.2d 1197, 1200-03, 26 USPQ2d 1600, 1603-06 (Fed. Cir. 1993)). Accordingly, a complete disclosure should contain some indication of the practical application for the claimed invention, i.e., why the applicant believes the claimed invention is useful.

Apart from the utility requirement of 35 U.S.C. 101, usefulness under the patent eligibility standard requires significant functionality to be present to satisfy the useful result aspect of the practical application requirement. See *Arrhythmia*, 958 F.2d at 1057, 22 USPQ2d at 1036. Merely claiming nonfunctional descriptive material stored in a computer-readable medium does not make the invention eligible for patenting. For example, a claim directed to a word processing file stored on a disk may satisfy the utility requirement of 35 U.S.C. 101 since the information stored may have some "real world" value. However, the mere fact that the claim may satisfy the utility requirement of 35 U.S.C. 101 does not mean that a useful result is achieved under the practical application requirement. The claimed invention as a whole must produce a "useful, concrete and tangible" result to have a practical application.

Regarding claims 1, 9 and 29, independent claims 1, 9 and 29 end claim limitations with, "**invoking an analysis** based on upon said at least one dimensional attribute", which (invoking analysis) does not provide tangible result and real world application. Therefore, the claims (claims 1-21 and 23-37) are not a statutory system and should be rejected under 35 U.S. C. § 101 as not being tangible.

Examiner Note: Claims 22-26 were objected to as being dependent upon a

rejected base claim, and rewritten in independent form in claims 1, 9 and 29, including all of the limitations of the base claim and any intervening claims. However, independent claims, 1, 9 and 29 are still non-statutory. Thus, claims 1,9 and 29 are required statutory for allowance.
